

# Welcome to MosquitoMax™ Misting Systems...

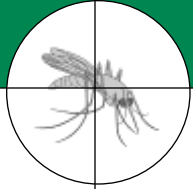

**the higher standard in outdoor  
automated insect control**

**when we move in... they move out.**

 **MosquitoMax™**  
misting systems

# Enjoy your back yard again. Around the clock and all year round

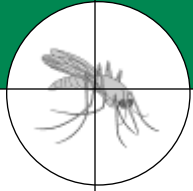

- Mosquito borne illnesses are real.
  - West Nile Virus
  - Western Equine & St.Louis Encephalitis
  - Canine heartworms
  - Malaria
  - Yellow Fever

**when we move in... they move out.**

# How Misting Systems Work

- Stainless steel nozzles and special tubing are strategically placed around your yard.

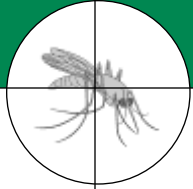

**when we move in... they move out.**

# How Misting Systems Work

- A highly diluted insecticide or repellent/water solution is sprayed at morning and night. The mist is super fine.
- Two minutes a day is standard using insecticide to control mosquitoes.

# How Misting Systems Work

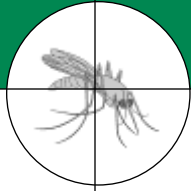

- The system is completely automated providing hassle-free 24 hour insect control.

Optimum daily spraying times

**when we move in... they move out.**

# MosquitoMax Systems can use More products than other misting systems due to mix on demand technology

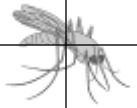

- Natural Pyrethrin does not leave a residue and is low in toxicity.
- Synthetic Pyrethrin aka: Permethrin is low in toxicity and provides residual protection.
- FIFRA 25B Products: All of the product's ingredients appear on the EPA's "Exempted" 25(b) Active Ingredient List and the 4A Inert Ingredient List.
- Cedar, Citronella, Garlic and Orange oil repellents are additional Non-Toxic Options
- All products are effective when used as directed on mosquitoes and other insect pests.

**when we move in... they move out.**

# We start with a custom layout

- Proper design is crucial to maximum control.
- On-site visit identifies optimum nozzle placement.
